Allowable Subject Matter

New claims 11-14 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to new claims 11-12, the cited prior art does not disclose, teach or suggest, alone or in combination, the arrangement of a cover support structure including a case main body having a back plate; and a cover having an upper plate and two side plates, wherein one of said side plates of said cover has a first slit groove formed therein and said upper plate has a cut therein at a side thereof of the other of said two side plates of said cover so as to form a support plate extending downwardly, said support plate having a second slit groove formed therein so as to open rearwardly; and said first slit groove and said second slit groove are arranged to be positioned to be positionable to mesh with said back plate of said case main body in an open position of said cover to support and maintain said cover in an upright position so that said cover is prevented from turning downward in the open position thereof.

With respect to new claim 13, the cited prior art does not disclose, teach or suggest, alone or in combination, the arrangement of a cover support structure including a case main body having two side plates and back plate, and a cover having an upper plate and two side plates, wherein each of said side plates of said case main body has an engagement groove formed in a protrusion protruding outward of said side plates of said main case body, each said engagement groove opening upward, and each of said side plates of said cover has a cylindrical projection protruding outward therefrom and fitted in a respective said engagement groove of said case main body, and wherein said

Art Unit: 2831

cover is supportable in an upright position with a rear of said upper plate of said cover maintaining contact with said back plate of said case main body when said cover is opened.

With respect to new claim 14, the cited prior art does not disclose, teach or suggest, alone or in combination, the arrangement of a cover support structure including a case main body having two side plates and back plate, and a cover having an upper plate and two side plates, wherein each of said side plates of said case main body has an elongated circular projection formed therein, and each of said side plates of said cover has an engagement groove formed therein so as to open rearward or downward, each said engagement groove having a respective said elongated circular projection fitted therein, and said cover is maintained upright by engagement between each said engagement groove and a respective said elongated circular projection in the vertical condition of said cover.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Adolfo Nino whose telephone number is (571) 272-1981. The examiner can normally be reached on M-F (7:30-5:00).
